#### **Narrative: 1**

ON SHORT FINAL TWR TOLD ME TO GAR. I ACKNOWLEDGED AND PULLED UP GEAR IMMEDIATELY, TWR SAID 'DO A 360 DEG TURN TO THE R AND YOU'RE #1 TO LAND.' I THEN PUSHED GEAR CTL LEVER DOWN AND DID AS I WAS TOLD. R SEAT PAX SAID SHE HAD THE R WHEEL AND I VISUALLY CHKED L WHEEL, WHICH WAS DOWN, NO WARNING HORN. NEXT SOUND WAS THE SCRAPING OF THE BELLY ON THE RWY.

Semi-Markov  
Models  
Text  
Classification

Results

Multiple Kernel  
Learning  
Hidden  
Semi-Markov  
Models  
Text  
Classification

Conclusions

Measured by a score composed of precision and recall.  
Precision: Fraction of reports that were correctly labeled.  
Recall: Fraction of reports that were correctly labeled out of the true number of reports that should have been labeled.  
This score was 6.3% higher than the score from a purely supervised baseline [6]

# Conclusion

Aviation Data

Results

Multiple Kernel  
Learning

Hidden  
Semi-Markov  
Models

Text  
Classification

Conclusions

Data mining techniques improving in aviation. We have discovered:

- How to detect heterogeneous anomalies more effectively
- HSMMs are better at detecting anomalies in aviation than HMMs
- A bootstrapping algorithm to find causes in aviation incident reports
