## **Evolutionary Computation**

https://www.spigotmc.org/attachments/evolution-jpg.137048/

- Subfield of Artificial Intelligence
- Algorithms based on biological evolution
- Uses lots of terminology from biology, doesn't always mean same thing as term means in biology.

Knapsack problem

Based on https://upload.wikimedia.org/wikipedia/commons/thumb/f/fd/Knapsack.svg/ 1200px-Knapsack.svg.png

Overview Background

Hyper-heuristics

GP Variants

Autoconstruction

Summary

# **Evolutionary Computation – Terminology**

- Individual a potential solution to a problem (or set of problems)
- Population a group of individuals
- Fit how well suited an individual is at solving a problem
- Fitness Test a set of tests to determine how fit an individual is.

#### **Evolutionary Computation – Terminology**

- Mutation an insertion, deletion, or small change in an individual, creating a new individual
- Sexual reproduction when two or more individuals are munged together to create a new individual

#### **Evolutionary Computation – Terminology**

- Mutation an insertion, deletion, or small change in an individual, creating a new individual
- Sexual reproduction when two or more individuals are munged together to create a new individual

If individual A experiences a mutation to create individual B, then:

• Parent – Individual A

• Child - Individual B

#### **Evolutionary Computation – Terminology**

- Generation a population of individuals
- Global optima best solution (or solutions) possible
- **Stopping point** time limit, or generation limit.

A family of algorithms in Evolutionary Computation that uses biological techniques to create programs to solve computational problems.

Autoconstruction

- What is it?
- AutoDoG
- Results of AutoDoG

Autoconstruction is a type of genetic programming

hyper-heuristic (GPHH)

Overview<br/>ooBackground<br/>oocoooHyper-heuristics<br/>oocoGP Variants<br/>oocoAutoconstruction<br/>oocoooSummary<br/>output

### What is Autoconstruction?

- Autoconstruction is a type of genetic programming hyper-heuristic (GPHH)
- In most GPHH, the individual programs are evolving, but everything else is specified by the engineer; in autoconstruction, evolution is evolving as well.

Overview<br/>ooBackground<br/>ooHyper-heuristics<br/>ooGP Variants<br/>ooAutoconstruction<br/>ooSummaryOutputOutp

### What is Autoconstruction?

- Autoconstruction is a type of genetic programming hyper-heuristic (GPHH)
- In most GPHH, the individual programs are evolving, but everything else is specified by the engineer; in autoconstruction, evolution is evolving as well.
- Programs are responsible for evolving solutions *and* responsible for constructing their offspring.

Overview 00	Background	Hyper-heuristics	GP Variants	Autoconstruction	Summary
AutoDo	bG				

• A system designed by Spector et al. [2] that uses autoconstruction to evolve programs.

Overview	Background	Hyper-heuristics	GP Variants	Autoconstruction	Summary
Auto	DoG				

- A system designed by Spector et al. [2] that uses autoconstruction to evolve programs.
- Uses the Push programming language
